PARADOR

living performance

Good reasons for Parador

Philosophy

We live for products that make every home the most beautiful home in the world. Our value compass points the way: Innovative, sustainable and ecological, we are committed to the highest quality standards in all aspects of our company. In the process we always keep our feet on the ground – the basis of our success.

Inspiration & Design

The contemporary design of our floors is influenced by the latest trends from art, design, architecture and lifestyle. This inspiration is taken up by our design team, which transforms them into innovative and special looks that turn our products into trendsetters of living space design with an outstanding ecological balance.

Quality & Materiality

Parador offers aesthetic flooring concepts for every application, which are produced from high quality and recyclable materials. An authentic look, functional design and the environmentally friendly selection of materials enable the implementation of sophisticated "Made in Germany and Austria" living ideas.

Technology

In order to make laying by hand simple and effective, Parador offers innovative click connections or high-quality adhesive systems that ensure long-term stability, depending on the product. From use in damp rooms to the integration of underfloor heating, flooring from Parador provides the perfect solution in premium quality for every context.

Healthy living

The production of environmentally friendly products is a key concern for us and is firmly anchored in our corporate philosophy. Our floors promote healthy living, are low-emission and create a pleasant living environment. We mainly use natural raw materials which are subject to constant review.

Sustainability

As a traditional wood processing company, a high regard for the environment is the foundation of our work. For this reason, we want to set standards in all aspects of ecologically responsible production – from raw materials to finished products to logistics.

PARADOR

Vinyl flooring – a genuine top performer

As a modern and innovative material vinyl flooring is the first choice for aesthetic and functional high-quality room concepts. Vinyl flooring shines in both private and commercial contexts when it comes to maximum durability. With vinyl flooring, the authentic reproduction of near-natural materials succeeds in astonishing perfection. Parador's vinyl flooring offers an optimal solution for every usage scenario and enables uniformity across the various vinyl products - whether as a solid material or the three product types with an HDF core-board, with an SPC core-board or whether installed floating or stick-down.

The Basic, Classic and Trendtime product lines offer a variety of decors for every requirement, turning individual living dreams into reality. With the innovative click system, you can quickly and effortlessly benefit from this flexible "Made in Germany" trendsetter.

A sense of space with a system

We understand high-quality floors in a holistic way: the perfect interplay of all elements underlines the systemic principles that set Parador apart. Our accessories continue the high-quality line of resilient vinyl floor coverings in terms of design and quality down to the last detail: skirting boards, end caps, underlays and optimal care make your floor what it is: the stage of your life.

Product lines

Parador vinyl flooring is an aesthetic all-rounder: with its decors and surfaces, our vinyl flooring rooms create a special atmosphere and take on every renovation technology challenge. In the three product lines Basic, Classic and Trendtime Parador offers a performance spectrum that provides an appropriate stage for individuality. For the most personal place in the world: the home.

Basic

Those who are price-conscious yet don't want to forgo quality will find in the Basic line a convincing selection of attractive vinyl floors for a beautiful home.

Parador

Vinyl flooring

Vinyl flooring with HDF core board

The flooring for that special living comfort

Vinyl flooring with HDF core board is the perfect solution for designing living spaces when slight bumps need to be evened out. The integrated footfall sound insulation made of cork ensures pleasantly quiet room acoustics with high running comfort at the same time. Vinyl flooring with HDF core board is robust and easy to maintain and is easy to lay thanks to the intelligent click system.

Particularly quiet

Particularly dimensionally stable

For slightly uneven substrates

High walking and living comfort

Vinyl flooring with SPC core board

The all-rounder for every room situation

Vinyl flooring with SPC core board is the floor for universal application. Its rigid core board perfectly evens out bumps in the substrate. Renovations on tiles can give the living space a completely fresh look with little effort. Vinyl flooring with SPC core board is the ideal choice for demanding room situations such as large rooms, floor-to-ceiling windows and conservatories. It also lends a special atmosphere to damp rooms.

Vinyl flooring from solid material

The classic with low installation height

Vinyl flooring made of solid material is robust and easy to maintain and thanks to its water resistance is specially suited to rooms which are exposed to moisture. Its low installation height makes it the ideal renovation solution where every millimetre counts and thereby rounds off its application possibilities. Vinyl flooring made of solid material can be quickly and easily laid owing to its intelligent click system.

Vinyl flooring for gluing

The flooring for demanding spatial projects

Vinyl flooring for gluing is ideal for demanding renovation projects due to its extremely low installation height. Gluing ensures strong bonding to the substrate and combines a cosy ambience with extreme resilience. Vinyl flooring for gluing offers authentic wood and stone looks in living rooms and damp rooms and also makes a good impression in conservatories.

Surface design

Real beauty amazes not only the eye: the natural-looking surfaces of the Parador vinyl floors, together with the bevel image, offer an impressively coherent overall experience. While the bevel design distinguishes the characteristic profile of the floor, the texture embossing accentuates the materiality of the decor significantly, such as wood, stone or concrete. It is embossed deeper and flatter, but is always perceptible and friendly to those who walk on it barefoot, with shoes or on four paws: hard-wearing and easy to care for.

Bevel design

Without bevel

In the case of the classic laying, the planks connect without any clearly recognisable spaces. The harmonious image of the floor creates a closed overall impression.

4-sided bevel

The all-round bevelled long and end edges create a pattern with the charm of a genuine wood or tile floor, in which the individual floorboard is emphasised.

Textures

Antique texture

The precious charm of genuine wood is emphasised in this texture and implemented particularly authentically.

Brushed texture

The brushed surface intensifies the pleasantly natural feel.

Wood texture

The wood texture embossing creates an astonishingly genuine wood impression which you can really feel.

Vivid texture*

This texture emphasises woody elements such as branches and flowery, noticeable grain for a vivid texture.

Mineral texture

With a porous, rough surface, the character of fine stone floors is conveyed in a near-natural way.

Rustic texture

Signs of processing and usage lend the charm of old wood.

Rough-sawn texture

The visual appearance of sawn wood in a used look with saw marks is depicted in this texture.

Stone texture

The character of modern stone flooring with noticeable unevenness is reproduced in this surface.

*With synchronous pore: the synchronous pore lets you feel exactly what you see and creates a near-natural and authentic living experience.

Skirting boards and caps

Parador offers a wide range of optically matching skirting boards for a harmonious look for any decor. Alternatively, the colours stainless steel, white and black or a primed surface for the individual colour scheme allow the possibility for deliberate accentuation.

Depending on the condition of the substrate (masonry), clip or glue joints can be used for optimum wall mounting. Parador skirting boards are prepared for easy installation: with a clip system or groove for adhesive mounting. Interior and exterior corners as well as end caps and transition caps hide saw cuts and make mitre cuts unnecessary. Simply perfect!

Caps

The practical, flexible skirting board caps create clean transitions, corner solutions and finishes for the skirting boards SL3, SL5, SL6 and SL18. The caps are offered in Aluminium look or white.

Also for the Hamburg mouldings HL1, HL2 and HL3 Parador offers a new height variable cap product range in plain white.

Profiles

Combination profiles from Parador complete installations to create beautiful aesthetical floors. As transition profiles, combine high floor coverings and expansion joints. Adapting profiles are used for the transition between different high floor coverings. End profiles create clean borders with tiles, sleepers and French windows.

Aluminium profile

Aluminum profiles in anodised silver or stainless steel ensure successful transitions from room to room, connect floor coverings of different heights and ensure clean finishes and provide elegant and skillful accents.

3-in-1 HDF profile vinyl flooring

With the innovative 3-in-1 HDF profile vinyl flooring floor harmony succeeds with perfection. Can be universally used as a transition, adaptation or end profile and being absolutely identical in decor and texture to the vinyl floor, it ensures a particularly harmonious floor pattern.

Designs

Underlays

Parador offers the optimal solution for every application: the underlays smooth out minor unevenness and at the same time provide high compressive strength. With an integrated vapour barrier the right underlay ensures the required moisture protection in the case of mineral substrates. For solid vinyl flooring Parador recommends the specially developed underlay Solid-Protect.

Whether a high-tech solution or an all-rounder. Underlays from Parador really emphasise the quality of the floor covering.

Product features

Footfall sound / Ambient sound

Parador underlays offer footfall sound insulation in three stages – one, two or three shafts provide particularly effective footfall sound insulation.

Suitable for underfloor heating

Parador underlays are optimally compatible with underfloor heating.

Moisture resistance

Parador underlays offer moisture resistance in two stages, which are marked with one drop or two drops (high protection).

Suitable for uneven substrates

Parador underlays compensate for unevenness and are recommended during renovation.

Compressive strength / dimensional stability

Parador underlays are characterised by high dimensional stability and compressive strength in three stages – from 20,000 kg/m² above 45,000 kg/m² up to 50,000 kg/m².

For gluing

Thanks to the practical adhesive technology, the vinyl floor with Dryback from Parador can be glued effortlessly and cleanly.

The Parador programme for elastic floor coverings

A top performer with personality: the elastic floor coverings from Parador meet individual demands for comfort, durability, versatility and ecology. As shown by the versatility of its' vinyl flooring products, Parador also offers the innovative Modular ONE and low-noise Eco Balance PUR.

Vinyl flooring – a genuine top performer. With HDF core boards, as solid material or for gluing, the ideal floor covering for every usage scenario.

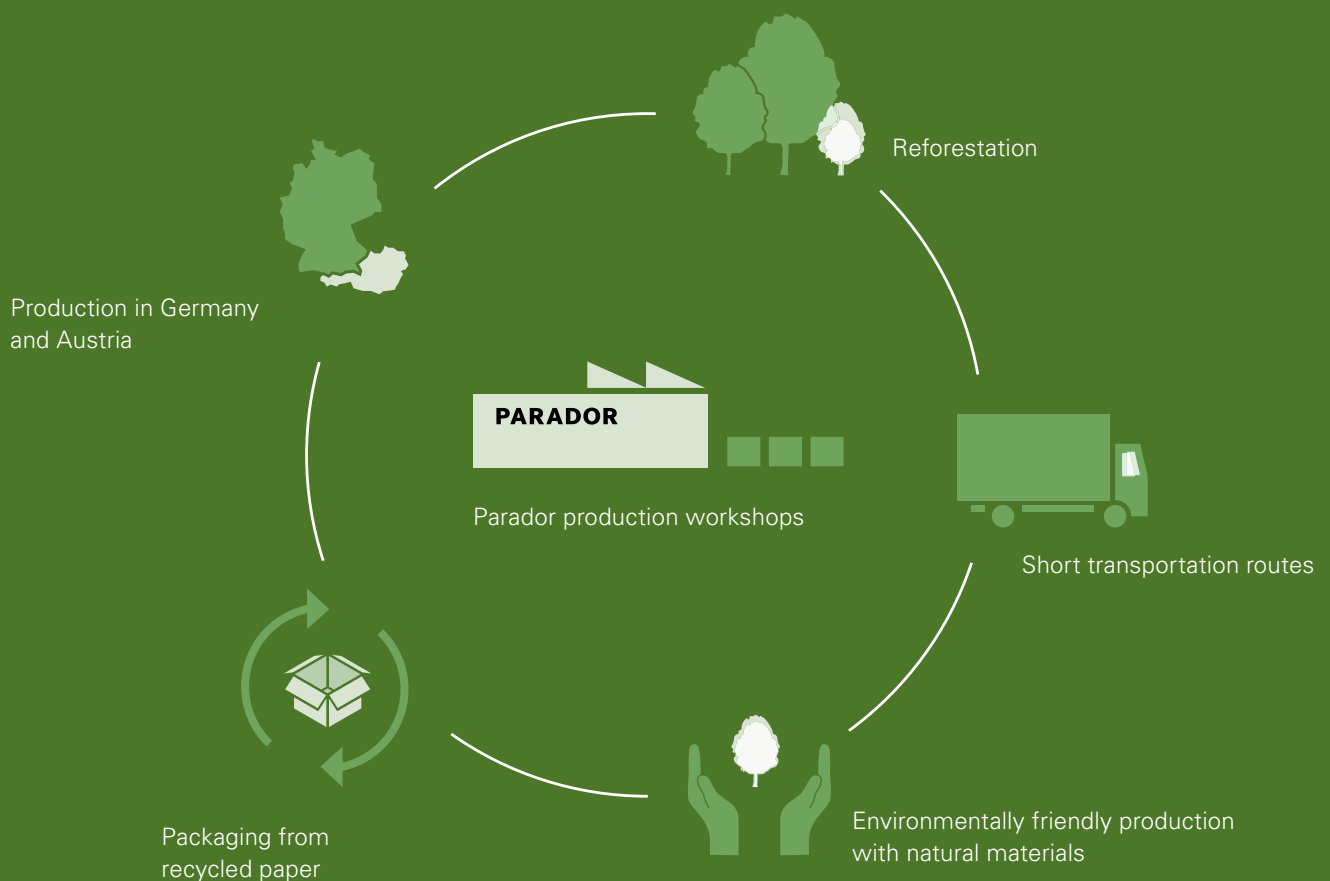

Modular ONE – the innovative all-rounder. Softener-free multi-layer technology for robust floors with natural, authentic designs.

Eco Balance PUR – the low-noise alternative. Made of softener-free polyurethane for maximum comfort, healthy living and design.

Sustainable setting standards

Certified security from responsibility

As a brand manufacturer, Parador is fully and continuously certified by independent institutions. Production processes, materials, resource and environmental management, as well as product quality, meet the high corporate values of a brand with responsibility, in addition to the legal requirements. Our quality standards for vinyl resilient floor coverings go beyond legal requirements, something which is proved by the various certifications.

EN 14041:2004/AC:2006

EN 14041:2004/AC:2006

The CE marking is obligatory according to EU law in connection with product safety.

Émissions dans l'air intérieur (Class A+)

This national classification valid in France indicates the quality of indoor air.

TÜV Rheinland

Parador vinyl flooring has earned the TÜV certification mark thanks to its perfect product quality, product safety, understandable user documentation and the independent monitoring by the objective institute TÜV Rheinland Germany.

PEFC™

This trademark is awarded to products that meet the requirements of the certification system for the documentation and improvement of sustainable forest management with regard to economic, ecological and social standards.

MMFA

Parador is a founding member of the MMFA association of multi-layer modular floor coverings e.V.

Good reasons for Parador

Our stance

As a traditional wood processing company, we have a special awareness of our environment. For us at Parador, sophisticated living goes hand in hand with the responsibility to preserve nature for future generations. This includes the sustainable use of our resources. Every product made of wood is an active contribution towards climate protection. As a vital carbon store, wood products are increasingly entering people's consciousness, especially in the field of construction and renovation. Products made of wood and wood materials are sustainable and help to secure the future of the next generations.

Commitment

Parador is the first and so far the only producer of floor coverings to be EMAS-certified. In this way, we are committed to constantly optimising our environmental management: the requirements and components of EMAS include the involvement of all the company's employees, transparent and sustainable communication with the public, continuous improvement of our own environmental performance and compliance with applicable legislation. EMAS is recognised worldwide as the most demanding system for sustainable environmental management.

Production

Our main raw material is wood from predominantly sustainably managed forests. We offer exclusively real wood from controlled sources of supply. The demand for transparency spans all aspects of the value chain and is documented in defined environmental standards for our suppliers. Our production is characterised by the avoidance of emissions and the return of reusable materials into the production cycle, short transport distances and the use of recyclable materials.

Society

We have been involved with the "Plant for the Planet" foundation since 2011, whose goal is to put a stop to the climate crisis. Against this background, Plant for the Planet has set itself the task of planting a trillion new trees worldwide by 2020. Parador is supporting the initiative with tree planting and the organisation of children's academies. In the meantime, we have trained 550 children to become climate ambassadors and have planted 110,000 trees.
